Graded Nursery Stock

Millburn Horticultural Gardens

(NORTH JERSEY NURSERIES)

MILLBURN, N. J.

Please do not consign this pamphlet to the waste basket. We are sending it to you because we believe you are interested in what we have to sell. If we are mistaken in this, then kindly hand it to some friend whom you believe will be interested. Send for our catalogue or call and see us. We will try to give you scientific and practical advice.

PRICES—Quoted are for best commercial grade and quality. We quote by height and caliper, but it must be remembered that the height does not always indicate the value of a tree or plant—a very short and compact specimen is more valuable than a slim, straggly one of the same height. Customers can rely upon our selecting good value for the prices charged.

DELIVERY—Orders will be safely and securely packed in boxes or bales and delivered F. O. B. cars, freight or express charges to be paid by the purchaser. Our nearest shipping station is Millburn, Lackawanna Railway. We will use our judgment whether to ship by freight or express unless instructed by the customer.

TERMS—Customers with whom we have had no dealings heretofore should remit with order, or send references. All accounts are due, net cash, as soon as goods are received. When goods are ordered by express C. O. D. one-fourth the amount in cash should accompany the order.

EARLY ORDERS—Customers should send in their orders early, so we can place them on our aggregate. Our work in the shipping season is necessarily very much crowded. We have a large amount of orders to ship in a very short time. We are often sold out of certain varieties and obliged to refuse late orders. **Order Early.**

SHIPPING SEASON—Usually commences Sept. 15th in the fall, continuing as long as ground holds open. In the spring from the 15th of March until end of May.

GUARANTEE—We guarantee all our stock true and in good condition on leaving our hands, but do not guarantee it to live and grow at these prices. In

case any mistake should happen in the naming of a plant we will replace it with the true variety as ordered.

CLAIMS—All claims for errors must be made upon receipt of goods.

This list conforms in order with varieties described in our General Catalogue, which see.

STOCK—Much of our stock is grown for us on contract by specialists in other States. We haven't the acreage here. We believe in the intensive method of cultivation. We grow the cheaper kinds of stock where land is good and cheap. We have facilities here for wintering stock that is not hardy in our latitude. We grow and give particular attention to Evergreens and also importing large quantities of these from Holland and France each spring ready to fill customers' orders, if they prefer, with imported stock. We always have stock not described in our catalogues which we shall be pleased to show and explain to you if you will call. The manager lives on the place here and is seldom away. We have about 40 trains daily from Newark and New York, many of them express to Millburn. The trolley passes our door connecting Newark, Summit and Elizabeth. Come and see us.

SPECIALTIES

We propagate in large quantities the following kinds of stock.

CATALPA BUNGEII

TEAS WEEPING MULBERRIES

CLIMBING VINES & FLOWERING SHRUBS

HERBACEOUS PLANTS

We have a large assortment of Evergreens. These are indispensable in decorating a lawn. They are particularly valuable about the foundation of a dwelling house or garage. We can arrange the plan for you and designate such varieties as will be best suited to a certain position. If you need expert advice as to how to decorate your home grounds, send for our landscape man who can give you as good service as your family doctor when you are ill. We know what kinds will stand our severe winters and what will not.

Customers will please note, that the proper time to plant, depends much on the condition of the stock when received. In Georgia the foliage may be out on the native trees when our dormant stock arrives. This, however, is not a serious matter. Our dormant stock will grow and thrive if planted then.

This list follows the order of our general catalogue which see.

We give both the botanical and the Common names.

The Robinson Press
Hatboro, Penna.

ORNAMENTAL DEPARTMENT

DECIDUOUS TREES

Several times transplanted, clean and smooth with well formed heads. One dozen will be sold at 10 times the single tree rate.

UPRIGHT DECIDUOUS SHRUBS

Upright, clean, bright stock, strictly first-class. The size mentioned after each variety is that considered as proper for first-class plants, suitable for transplanting. The size varies according to the habit of growth of the varieties mentioned, as, of course, some plants when fully grown are smaller than others, but exactly as good.

EVERGREENS

Evergreens are a specialty with us and our collection includes many rare and beautiful specimens as well as a large stock of the more common sorts. We transplant all our evergreens frequently, which practically insures their success.

We will dig with soil on the roots and bag in burlap all evergreen trees in value of 75c and up, unless their character is such as to make this an unnecessary expense. We will at all times do what is best for the plants with least expense to the customer.

ABIES — <i>White Spruce</i> , 1½-2 ft.75

HARDY HERBACEOUS PLANTS

Under this head we try to carry a good assortment.

Fall is a good time to plant these in our climate as flowers in abundance will then be obtained the following season. All can be planted in the spring.
